

We asked our engineers :

"What's special about working for McFarlane Telfer ?"

They said :

The Basics : Pay and That

"the pay's outstanding – and every hour is paid – dead fair"

"28 holidays a year – on top of your bank holidays"

"automatic long-term-disability and death-in-service insurance – family security"

"3% contributions to my personal pension scheme"

"superb spec vans and equipment, properly maintained"

The Add-ons : Working Conditions

"brilliant client list – world-class places to work"

"we're a small team of mates you can rely on – out on the road or in the office"

"real attention to Health & Safety – serious but fun"

"very high standards – from ISO9000 and the Environment to Social Projects"

"and we know we all work to the same high standards on every job"

The Clincher : Training and Development

"fantastic training – really enjoyed the technical skills course at Langley"

"and the training's not only trade stuff, the EI sessions were great"

"manufacturer's courses – from industry leaders like Rational and Winterhalter"

"really value the monthly meetings – we all get to keep in touch with what's going on"

"and, of course, they put you through your CORGI stuff – I did my LPG and Comcat 5"

"they don't just promise the training – they really deliver it"

"far and away the best place I've ever worked"

We say :

"talk to any of our engineers – they know their business"

If you've got what it takes, to earn an outstanding package and be part of a great team, ring Robert Sousa on 07801 864151 to have a chat – and start a great future.
